The numbers of the papers given in the second column of the foregoing table are not used in either the Subject or Author Index, the references in each being to the volume and page. In the Subject Index the year of publication is added.

Papers Nos. 0 to 57 (inclusive) were published separately at irregular intervals, and their collection in volumes is arbitrary.

Beginning with Paper No. 58 (Nov., 1873), the *Transactions* were issued in monthly numbers; this form of publication was discontinued with Paper No. 769 (Dec., 1895).

Since Jan., 1896, papers have been published in monthly numbers of *Proceedings* in advance of the date of their presentation to the Society, and the volumes of *Transactions* (beginning with Vol. XXXV and with Paper No. 770) have been made up of these papers and the discussions to which they have given rise.

Parts A, B, C, D, E, and F of Vol. LIV contain the papers and discussions presented at the International Engineering Congress held under the auspices of the Society, at St. Louis, 1904.
